

Quality Management

Professionalism and performance for partnership research

Quality management: a strong commitment for business

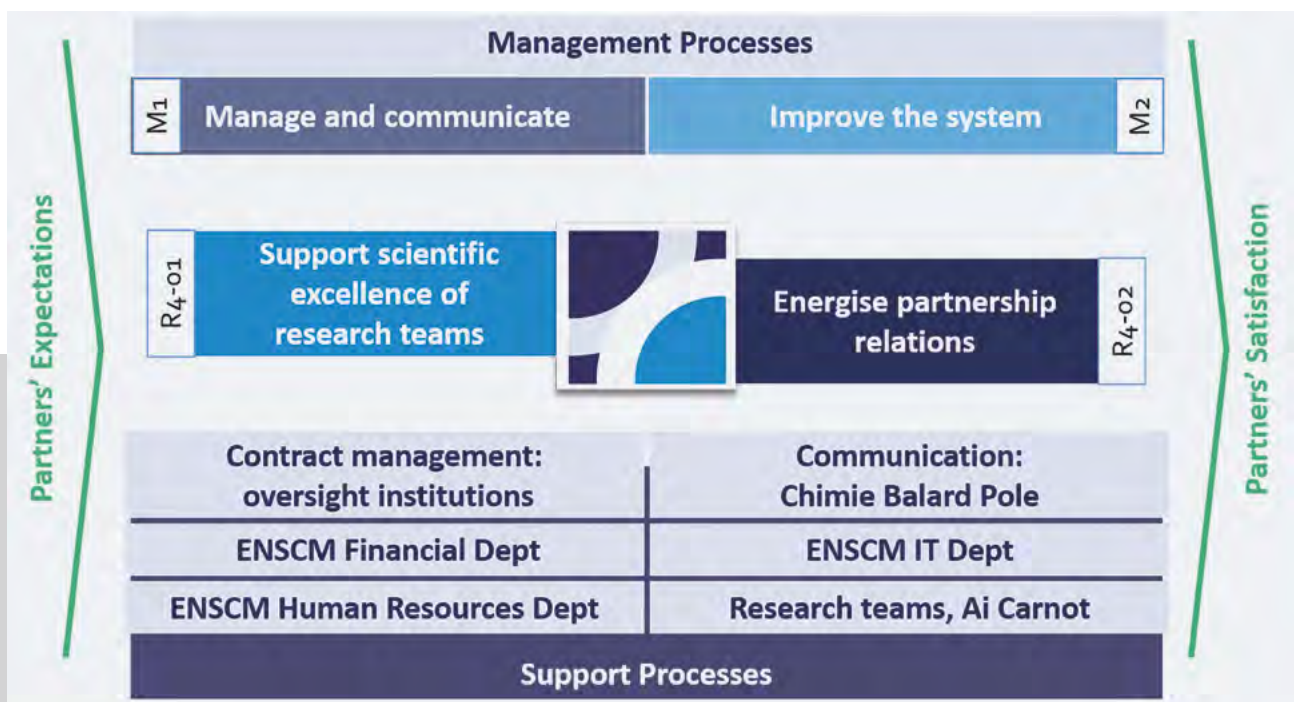

2017 was marked by the renewal of the Chimie Balard Cirimat Carnot Institute's ISO 9001 certification, first obtained in 2008. This success is the fruit of the strong implication of the Institute and its teams in this process of quality management, in place since 2007.

Driven by the Carnot Charter and implemented with the support of the Quality Management teams of the ENSCM and CIRIMAT, the quality assurance program of the Chimie Balard Cirimat Carnot Institute responds to the expectations of our public and private sector partners.

Respecting ISO 9001 norms, the System of Quality Management applies to **our partnership relations, technology platforms and research activities.**

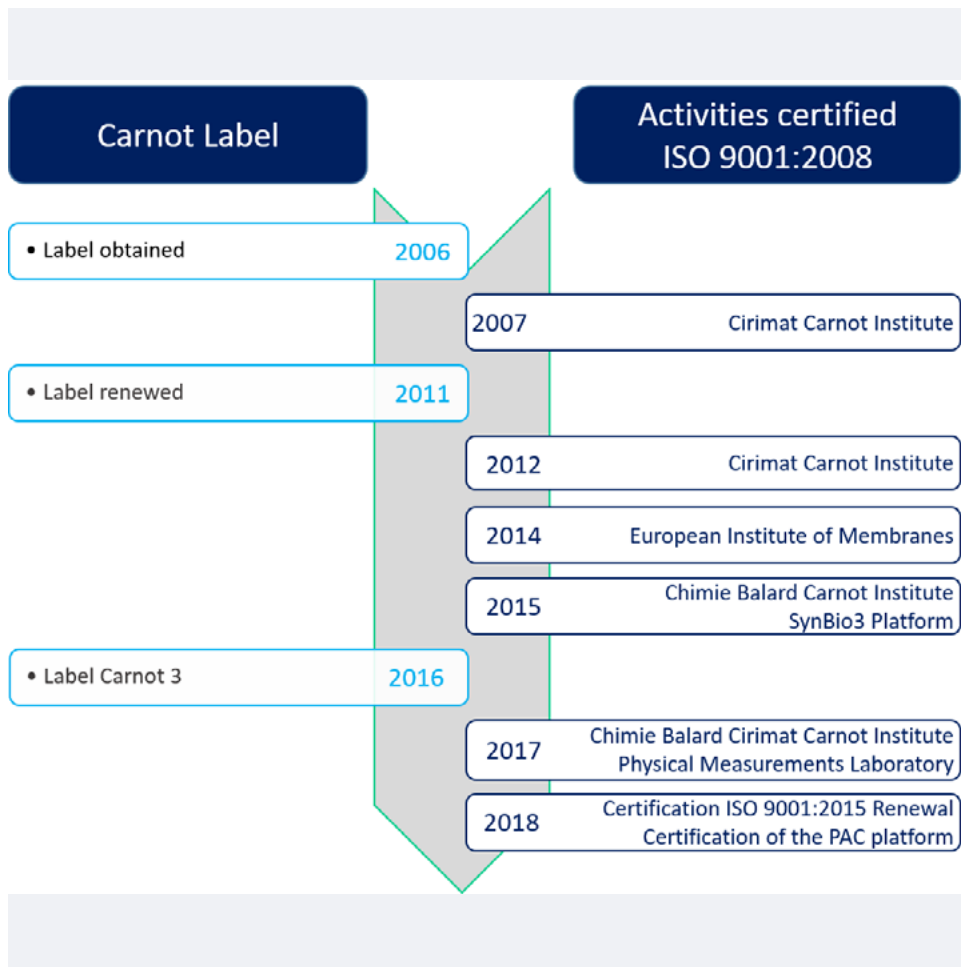

The institute's teams are engaged in this process on a daily basis. An essential dynamic to offer businesses research partnerships a high added value.

Yannick Guari, Director
Philippe Tailhades, Deputy Director

The Carnot Label, a motor for the quality process

Quality management at the heart of the partnership relation

► A structure dedicated to the needs of businesses

Strategic Orientation Committee, Carnot project calls, research project financing, professionalism

► A commitment through the network

Carnot Charter, École Nationale Supérieure de Chimie de Montpellier

► An effective partnership

One-stop shop, administrative support during the entire collaboration
